

READY, SET, FLOW.

EZ-FLOOR concrete saves time and money through ease of placement, increased finishability and consistent set times.

Part of the PERFORMX® series of mixes available from Inland Concrete, EZ-FLOOR concrete is elevating floor mix standards. Available in a wide variety of strengths and cement types, this flowable floor mix is ideal for residential, commercial and industrial applications.

“EZ-FLOOR is the only basement floor mix we use because it truly lives up to its name. It’s easy to place and easy to finish. We are better able to manage our business because of its improved workability and consistent setting times, resulting in greater profitability for our firm.”

~ John Greig, Jensen & Capponi Contractors

Performance Characteristics

EZ to Place

- Improved workability enables ease of placement

EZ to Finish

- Increased impermeability
- Improved set time consistency
- An internal finishing aid can be used to enhance the finish
- Compatible with texture stamped finishes
- Leading edge technology which reduces cracking, improves durability and generates fast set times

Cost Effective

- Reduces placing and finishing time
- Price competitive
- Reduced labor costs
- Improved time management and scheduling

Superior Performance

- Conforms to CSA requirements and local building codes
- Lower water/cement ratios result in enhanced long term durability
- Consistent
